Southport CyberCards Steel Beaks

FIRST Tech Challenge Team 13246

The Southport Middle School FIRST Tech Challenge Robotics Team, the Steel Beaks, exists to encourage students to find their passion, become an expert in what they are passionate about, and to communicate that passion to others in the community. Southport Middle School's Robotics Team 13246 is entering its 4th year of competition. In 2017, the Southport High School Robotics team worked to start a FIRST Tech Challenge Team (FTC), Team 13246 the CyberCards Steel Beaks, as part of their continuing goal to build a larger K-12 STEM program. This program is intended to give middle school students the opportunity to develop STEM skills and use them in a real-world situation.

What is FTC? FTC is designed for students in grades 7-12 to compete head-to-head, using a sports model. Teams are responsible for designing, building, and programming their robots to compete in an alliance format against other teams. The robot kit is reusable from year-to-year and is programmed using a variety of languages.

Teams, including coaches, mentors, and volunteers, are required to develop strategy and build robots based on sound engineering principles. Awards are given for the competition as for well as for community outreach, design, and other real-world accomplishments.

Students get to:

- Design, build, and program robots
- Apply real-world math and science concepts
- Develop problem-solving, organizational, and team-building skill
- Compete and cooperate in alliances and tournaments
- Earn a place in the World Championship
- Qualify for over \$10.4 million in college scholarships

FIRST Robotics not only impacts team members while they are on the team but for a lifetime. Recently, FIRST has published 10 years of evaluation data. The highlights of the data include:

- Students who participate in FIRST are 2 times as likely to major in Science or Engineering
- 33% of Female students who participate in FIRST major in Engineering
- 98% of students who participate in FIRST improved problem-solving skills
- 95% of students who participate in FIRST increased time management skills
- 93% of students who participate in FIRST increased conflict resolution skills
- Over 75% of FIRST Alumni are in a STEM field as a student or professional.

Please help Team 13246 continue to make an impact by considering a tax-deductible donation to our team. For more information, visit our website at www.southportrobotics.org or return the enclosed form with your check. We appreciate any amount you can donate.

Sincerely,

Mark Snodgrass

Team Coach
